

EQ™

PURE ARCTIC OIL

- pure omega-3 oil from 100% fresh, traceable and sustainable Arctic wild fish. Added organic cold-pressed olive oil and vitamin D3.

It's in our nature

EQ PURE ARCTIC OIL

The focus on exercise, diet and anti age is increasing. On the other hand, we struggle with several chronic diseases, such as cardiovascular disease, type 2 diabetes and obesity. Studies show that a balance between omega-6 and omega-3 is crucial for good health.

Today the ratio between omega-6 and omega-3 fatty acids in the typical Western diet is between 10:1 and 20:1. This means that we are getting up to 20 times more omega-6 than omega-3. The recommended ratio is lower than 5:1.

A BETTER BALANCE between the intake of omega-6 and omega-3 is one of the keys to improved health and will help to reduce and prevent the risk of development of chronic diseases.

EQ OMEGA-3 TEST

With the help of a simple self-administered device you will quickly get an answer to your omega-6 and omega-3 ratio. The blood sample on the filter paper is extracted and analysed according to international standards for omega fatty acid testing by Vitas AS Laboratory in Oslo, Norway.

Your results can be securely accessed on omegaratiotest.com after 15 – 20 business days.

GOOD FOR YOUR HEART

250mg EPA and DHA contribute to normal heart function.

GOOD FOR YOUR BRAIN

250mg DHA to maintain normal brain function. **Pregnant and lactating women:** 450mg DHA and 250mg EPA contribute to normal brain development in fetus and breastfed children.
